NOTIFICATION OF CHANGE

PCN 1709A: SU-8 Resin Supplier Location Change

This letter serves as the official notification that the raw material supplier for the resin used in MicroChem's SU-8 product lines has changed their location of manufacture from the United States to Asia. We expect that there will be no short-term impact for our customers given our current inventory of SU-8 resin in Westborough, MA.

Based on MicroChem's current resin consumption rate, we estimate that we have enough resin left in stock produced at the manufacturer's United States facility to support the manufacture of MicroChem's SU-8 product lines for approximately 9 to 12 months. The transition to using resin manufactured at the new Asian facility for all SU-8 products will occur once MicroChem's current stock has been depleted.

The report with supporting data of this change is available upon request.

Should you have any further questions, please do not hesitate to contact your sales representative at 617-965-5511 or by email at sales@microchem.com. Thank you for your understanding and MicroChem looks forward to meeting your material needs in the future.

Regards,
